

2023학년도 편입학 면접고사 기출문제

모집단위	문 제
유아교육과	2019 개정 누리과정의 개정 주안점을 설명하시오
	비고츠키(Vygotsky)가 제시한 근접발달지대, 비계설정의 개념을 설명하시오.
유아특수교육과	교사가 발달지체유아를 교육시킬 때 항상 중요하게 생각해야 할 것들이 있다면 그것은 무엇인가?
	발달지체유아를 교육시키는 교사는 어떠한 태도들을 갖추고 있어야 하는가?
초등특수교육과	특수교육대상자로 선정될 수 있는 장애 유형에 대하여 말하시오.
	장애인 등에 대한 특수교육법에서 규정하고 있는 특수교육과 통합교육의 정의에 대해 말하시오
언어치료학과 (학사편입)	의사소통장애 진단평가과정 중 선별검사와 심층검사의 기능이 각각 무엇인지 설명하시오.
	의사소통의 전체 처리과정에 대해 설명하시오.
작업치료학과	작업이란 무엇이며, 작업치료가 필요한 사람은 누구인가?
	작업치료는 어떻게 하는 것이며, 왜 해야 하는 것인가?
물리치료학과	지원동기는 무엇인가?
	고령화 추세에 따른 물리치료사의 역할은?
물리치료학과 (학사편입)	운동조절이론 중 과제지향훈련에 대한 장단점을 설명하시오.
	환자에게 맞는 운동강도를 처방하는 방법 중 예비심박수(HRR)를 이용해서 운동강도를 적용하는 경우 적절한 방법을 설명하시오.

간호학과	<p>아래 영어지문을 읽고, 지문의 내용을 바탕으로 자신의 의견이나 생각을 이야기 해주시길 바랍니다.</p> <p>The world population reached 8 billion in November, according to the United Nations (U.N.). This milestone was not unexpected. And it shows some good news: People are living longer, thanks in part to better healthcare. Still, population growth poses a danger in many parts of the world.</p> <p>A fair amount of the growth has been in the world' s poorer countries, especially in Africa. The trend will strain resources in these places. Other places with rapid growth include India, Pakistan, and the Philippines. Growing populations will make life harder in these places when combined with climate change. Less water and decreased crop production will mean more hungry people.</p> <p>Experts say the problem lies mainly with richer countries, like the United States and China. These countries consume the most energy and produce the most greenhouse-gas emissions.</p>
	<p>아래 영어지문을 읽고, 지문의 내용을 바탕으로 자신의 의견이나 생각을 이야기 해주시길 바랍니다.</p> <p>Robots are providing a helping hand in at least one care facility in the Twin Cities, as nursing homes struggling with finding staff.</p> <p>The Estates nursing home added two new robots to their facility to help those living with Alzheimer's and dementia.</p> <p>Patients at the nursing home are getting to know their new robotic helpers, Rosie and Pepper, which can help people to live longer and happier lives. Pepper helps Alzheimer' s and dementia patients with reminiscence therapy. The patient' s pictures and memories are entered into Pepper, who can talk and comment about them.</p> <p>Moreover, Pepper can recognize when a patient' s vitals reach seizure point and intervene or can help with sundowning when someone gets confused, anxious, and sometimes aggressive late afternoon into the evening.</p>

	<p>아래 영어지문을 읽고, 지문의 내용을 바탕으로 자신의 의견이나 생각을 이야기 해주시 길 바랍니다.</p> <p>Posttraumatic Stress Disorder (PTSD) may occur when a person is exposed to traumatic events. Persons so exposed may experience symptoms such as distressing memories of the event, avoidance of any reminders of the event, and physiological emotional difficulties. Police officers are often exposed to traumatic events, such as seeing abused children or dead bodies, severe assaults, and involvement in shootings, and are therefore at risk for PTSD. Such exposure can impair the mental well-being of officers and affect their ability to perform duties to the public. The potential long-term effects of PTSD in police officers may additionally lead to behavioral dysfunction such as substance abuse, aggression, and suicide.</p>
간호학과 (학사편입)	<p>아래 영어지문을 읽고, 지문의 내용을 바탕으로 자신의 의견이나 생각을 이야기 해주시 길 바랍니다.</p> <p>Why do common favorites like ice cream, peanut butter and pizza cause some children to feel nauseous, itch, cough and even gasp for air? It is a mistake of the body's immune system. The immune system's role is to protect the body from infections and other invaders. During an allergic reaction, the immune system identifies a food as something dangerous and releases chemicals. These chemicals cause the symptoms of an allergic reaction.</p> <p>No one knows for sure why the number of kids who suffer from food allergies is on the rise, but there are many theories. Some scientists believe changes in what we eat and an overemphasis on hygiene are contributing factors. In today's germ-busting, antibacterial world, there are fewer viruses and bacteria for our immune systems to fight. So scientists believe that immune systems are attacking normally harmless foods instead.</p>
